Subject: Washington Phase 2 DCIPHER Rollout

Good morning Scott,

We have not received confirmation of Washington's readiness to move to Phase 2 reporting for PUI and case information, or a list of DCIPHER users for Washington.

Since your state has begun testing, please provide at least two names and email addresses as soon as possible, so we can work with you to ensure these persons are authenticated within SAMS and complete the necessary 'Rules of Behavior' (RoB) to receive access to the COVID-19 PUI & Case Report Form within DCIPHER. Please let us know if you have any questions.

Thank you!

Subject: Request for DCIPHER Users

Dear Scott Lindquist,

Our team is working diligently to ensure that you have access to DCIPHER for the purpose of reporting COVID-19 PUI and cases. Receiving a list of DCIPHER users with email addresses will ensure that we can onboard your jurisdiction to 'Phase 2' of the reporting process this week.

To date, we have not received your list of desired users and corresponding email addresses. Please respond by **Monday, March 2, at 5pm ET** with a list of up to 5 DCIPHER users and their email addresses. You are welcomed to specify whether you want these people to have read-only or read-and-write access to DCIPHER. At least one person must have read/write access.

We appreciate your assistance in advance.

State Coordination Unit, Case-Tracking Team

(CDC/DDPHSIS/CPR/DEO); Gregg, William (Joe) (CDC/DDID/NCIRD/OD); Lindstrom, Stephen (CDC/DDID/NCIRD/DVD); nCoV PUI (CDC)
Subject: Washington State 2019 nCoV PUI
Attachments: DASH form-50-34.pdf, CDC RVDP Specimen Submission Guidelines v2.0.pdf, pui-form.pdf

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

CDC RESPIRATORY VIRUS DIAGNOSTICS PROGRAM

SPECIMEN SUBMISSION GUIDELINES

The Respiratory Virus Diagnostic Program, located within Division of Viral Diseases, Centers for Disease Control and Prevention (CDC), is responsible for the detection and identification of respiratory viruses (non-influenza), including respiratory syncytial virus, human parainfluenza viruses 1-4, human metapneumovirus, adenovirus, rhinovirus, coronavirus (including SARS-coronavirus and MERS) and human bocavirus. Diagnostic testing for human parvovirus B19 is also available on a limited basis. The successful diagnosis of respiratory virus infections depends on the timing of specimen collection, the type and quality of specimen collected, the conditions of storage and the prompt transport of the specimen to the CDC laboratory. Useful information on how to investigate a respiratory outbreak, including sample data collection forms can be found at: <http://emergency.cdc.gov/urdo/index.asp>

Prior to submitting any specimens, consultation is required

SAFETY NOTE

Health care personnel collecting clinical samples from potentially infectious patients should follow standard precautions and all pertinent biosafety guidelines. Sample processing should be performed in at least a Class II biological safety cabinet following a minimum of biosafety level 2 guidelines. Please refer to the CDC website for specimen handling biosafety guidelines: <http://www.cdc.gov/biosafety/>

TIMING OF SPECIMEN COLLECTION

Virus detection: Specimens should be collected as soon as possible after onset of illness, preferably within the first 3-4 days. Although some viruses may be detected after longer time periods, the likelihood of recovering most respiratory viruses diminishes after 3-4 days.

Serodiagnosis: Serum specimens should be collected during the acute stage of the disease, preferably during the first week after onset of illness, and again during convalescence, 2 to 3 weeks later. A single serum specimen collected during the acute phase of illness can be used in certain situations, such as for detection of human parvovirus B19. For MERS detection, a single serum specimen should be collected ≥ 2 weeks after symptom onset.

SPECIMEN TYPE

A variety of specimens are suitable and include nasopharyngeal (NP) swab, oropharyngeal (OP) swab, NP aspirate, NP wash, OP wash, bronchoalveolar lavage, tracheal aspirate, sputum, serum, blood, urine, stool, conjunctival swab, viral isolate, and cerebral spinal fluid. Multiple respiratory specimen types of ample volume are preferred. NP and OP swabs collected from the same patient can be placed together in a single vial. Swab specimens should be collected using only swabs with a synthetic tip (e.g., polyester, Dacron®) and an aluminum or plastic shaft. Swabs with cotton tips and wooden shafts are not recommended. Specimens collected with swabs made of calcium alginate are not acceptable. Cell culture medium from a virus isolate can be sent in a screw-cap vial.

SPECIMEN COLLECTION AND STORAGE

Detailed specimen collection and handling guidelines are available at: <http://www.cdc.gov/urdo/specimen.html>
Specific specimen collection/handling instructions and biosafety guidelines for MERS-CoV specimens are available at: <http://www.cdc.gov/coronavirus/mers/lab/index.html>

Refrigerate all specimens promptly after collection. If specimens can be shipped to CDC within 72 hours of collection, they should be kept refrigerated at 4°C and shipped on gel ice-packs. Freezing should be avoided if possible, as this will reduce virus viability. If specimens must be held for >72 hours, they should be promptly frozen at -70°C and shipped on dry ice. Liquid specimens should be aliquoted into properly labeled, leakproof, unbreakable screw-cap vials. Samples should be collected and processed in a manner that prevents cross-contamination between specimens, including changing gloves between specimens. Virus isolates can be shipped on gel ice-packs.

Continued on next page

SPECIMEN LABELING AND DOCUMENTATION

LABEL: All specimens must be labeled with a unique identifier assigned to the patient. The type of specimen and date collected should also be on the label.

FORM: Each specimen should be accompanied by a completed CDC Form 50.34 (also known as a DASH form). A copy of the form is available at: <http://www.cdc.gov/laboratory/specimen-submission/form.html>

LINE LIST: For multiple specimens, please include a line list of all specimens containing the unique patient and specimen identifiers, specimen type, date specimen collected, onset date of illness, previous test results, tests requested, and patient clinical description. Hard-copy and electronic versions should be provided.

SUBMITTER: Include the full name, title, complete mailing address, email address, telephone, and fax number of the submitter. This will be the person to whom the final report will be mailed.

SHIPPING GUIDELINES

Specimens should be packed according to International Air Transport Association (IATA) regulations <http://www.iata.org/whatwedo/cargo/dgr/Pages/index.aspx>. Shipments from outside of the United States may require an importation permit that can be obtained from the CDC. For specific instructions, see the "Packing, Shipping, and Transport" section from this CDC webpage document (last section): <http://www.cdc.gov/coronavirus/mers/guidelines-lab-biosafety.html>

Specimens should be stored and shipped at the temperatures indicated in the *Specimen Collection and Storage* section above. If samples are unable to be shipped within 72 hours of collection, they should be stored at -70°C and shipped on dry ice. Virus isolates can be shipped on gel ice-packs. When shipping a frozen specimen from long distances or from international locations, it is best to use a combination of dry ice and frozen gel ice-packs. The gel ice-packs will remain frozen for a day or two after the dry ice has dissipated.

All specimens must be prepacked to prevent breakage and spillage. Specimen containers should be sealed with Parafilm® and placed in ziplock bags. Place enough absorbent material to absorb the entire contents of the Secondary Container (containing Primary Container) and separate the Primary Containers (containing specimen) to prevent breakage. Send specimens with cold packs or other refrigerant blocks that are self-contained, not actual wet ice. This prevents leaking and the appearance of a spill. When large numbers of specimens are being shipped, they should be organized in a sequential manner in boxes with separate compartments for each specimen.

Some things **not to do**:

- Do not place any dry ice in the "Primary Container" or "Secondary Container", foam envelopes, ziplock bags, cryovial boxes, or hermetically sealed containers.
- Do not place Primary Containers sideways or upside down in ziplock bags.
- Do not place any paperwork in the Secondary Containers or ziplock bags, so as not to damage the paperwork.
- Do not use biohazard/autoclave bags to prepack your materials due the inadequate seal of these bags.

Specimens should be shipped for overnight delivery for arrival at CDC. ***If testing on a Saturday/Sunday/Holiday has been approved, make sure that the shipping instructions specify a Saturday/Sunday/Holiday arrival at the main CDC gate.*** Please email CDC laboratory staff (sgk5@cdc.gov) the shipping information, including the tracking number. All packages should be sent to:

Interim 2019 novel coronavirus (2019-nCoV) patient under investigation (PUI) form

As soon as possible, notify and send completed form to: 1) your local/state health department, and 2) CDC: email (eocreport@cdc.gov, subject line: nCoV PUI Form) or fax (770-488-7107). If you have questions, contact the CDC Emergency Operations Center (EOC) at 770-488-7100.

Today's date _____ State patient ID _____ NNDSS local record ID/Case ID¹ _____ State _____ County _____
 Interviewer's name _____ Phone _____ Email _____
 Physician's name _____ Phone _____ Pager or Email _____
 Sex ☐ M ☐ F Age _____ yr ☐ mo Residency ☐ US resident ☐ Non-US resident, country _____

PUI Criteria

Date of symptom onset _____

Does the patient have the following signs and symptoms (check all that apply)?

☐ Fever² ☐ Cough ☐ Sore throat ☐ Shortness of breath

In the 14 days before symptom onset, did the patient:

Spend time in Wuhan City, China?	<input type="checkbox"/> Y <input type="checkbox"/> N <input type="checkbox"/> Unknown
Does the patient live in Wuhan City?	<input type="checkbox"/> Y <input type="checkbox"/> N <input type="checkbox"/> Unknown
Date traveled to Wuhan City _____ Date traveled from Wuhan City _____ Date arrived in US _____	
Have close contact ³ with a person who is under investigation for 2019-nCoV while that person was ill?	<input type="checkbox"/> Y <input type="checkbox"/> N <input type="checkbox"/> Unknown
Have close contact ³ with a laboratory-confirmed 2019-nCoV case while that case was ill?	<input type="checkbox"/> Y <input type="checkbox"/> N <input type="checkbox"/> Unknown

Additional Patient Information

Is the patient a health care worker? ☐ Y ☐ N ☐ Unknown

Have history of being in a healthcare facility (as a patient, worker, or visitor) in Wuhan City, China? ☐ Y ☐ N ☐ Unknown

Is patient a member of a cluster of patients with severe acute respiratory illness (e.g., fever and pneumonia requiring hospitalization) of unknown etiology in which nCoV is being evaluated? ☐ Y ☐ N ☐ Unknown

Does the patient have these additional signs and symptoms (check all that apply)?

☐ Chills ☐ Headache ☐ Muscle aches ☐ Vomiting ☐ Abdominal pain ☐ Diarrhea ☐ Other, Specify _____

Diagnosis (select all that apply): Pneumonia (clinical or radiologic) ☐ Y ☐ N Acute respiratory distress syndrome ☐ Y ☐ N

Comorbid conditions (check all that apply): ☐ None ☐ Unknown ☐ Pregnancy ☐ Diabetes ☐ Cardiac disease ☐ Hypertension

☐ Chronic pulmonary disease ☐ Chronic kidney disease ☐ Chronic liver disease ☐ Immunocompromised ☐ Other, specify _____

Is/was the patient: Hospitalized? ☐ Y, admit date _____ ☐ N Admitted to ICU? ☐ Y ☐ N

Intubated? ☐ Y ☐ N On ECMO? ☐ Y ☐ N Patient died? ☐ Y ☐ N

Does the patient have another diagnosis/etiology for their respiratory illness? ☐ Y, Specify _____ ☐ N ☐ Unknown

¹ For NNDSS reporters, use GenV2 or NETSS patient identifier.

² Fever may not be present in some patients, such as those who are very young, elderly, immunosuppressed, or taking certain medications. Clinical judgement should be used to guide testing of patients in such situations

³ Close contact is defined as: a) being within approximately 6 feet (2 meters) or within the room or care area for a prolonged period of time (e.g., healthcare personnel, household members) while not wearing recommended personal protective equipment (i.e., gowns, gloves, respirator, eye protection); or b) having direct contact with infectious secretions (e.g., being coughed on) while not wearing recommended personal protective equipment. Data to inform the definition of close contact are limited. At this time, brief interactions, such as walking by a person, are considered low risk and do not constitute close contact.

Subject: Washington State 2019 nCoV PUI

Hello:

I received a phone call from Chas Debolt (chas.debolt@doh.wa.gov, cell (b)(6) home (b)(6) (b)(6) office 206-418-5431), WA Department of Health this afternoon.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick

contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient **does meet the criteria for 2019 nCoV person under investigation (PUI)**. Next steps recommended to Ms. Debolt:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible).
2. Please fill out the nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>. The local HD will monitor the patient.
5. Provider at clinic was recommended to implement standard, contact, airborne precautions and wear eye protection with the patient. Patient to continue face mask.

Thank you,
Lindsay

Subject: Washington State 2019 nCoV PUI

Hello:

I received a phone call from Chas Debolt (chas.debolt@doh.wa.gov, cell (b)(6), home (b)(6) (b)(6) office 206-418-5431), WA Department of Health this afternoon.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on (b)(6).

Given clinical history and epidemiologic link, this patient **does meet the criteria for 2019 nCoV person under investigation (PUI)**. Next steps recommended to Ms. Debolt:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible)
2. Please fill out the nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and

<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html> The local HD will monitor the patient.

5. Provider at clinic was recommended to implement standard, contact, airborne precautions and wear eye protection with the patient. Patient to continue face mask.

Thank you,
Lindsay

Subject: Specimen Shipping: Washington State 2019 nCoV PUI

Hello all:

I just spoke with Brian Hiatt who gave me the contact information of the microbiologist who will hand off the specimens for 2019 nCoV testing to World Courier:

Jessica Gant

Cell: (b)(6)

Desk 206-418-5562

Address: 1610 NE 150th Street, Shoreline, WA 98155

The DOH has asked that World Courier call Ms. Gant on both phone lines as cell reception is poor in the lab when arranging pick-up.

Steve: The lab plans to ship these using Category A. (b)(5) let them know that guidance is Category B, but they said Category A is even "more secure"?

Thanks,
Lindsay

Hi Chas:

Thanks! I'd still request that we talk on the phone for further instructions about the packaging of the specimens to make sure we get this shipment right since it's a holiday weekend. Please let me know when we can speak with you and a POC who will be working with these specimens.

We will need the name and a phone number of the person who will actually handoff the specimens to World Courier. Once you have identified this person, please let me know, and CDC will then arrange shipment and provide more details to you.

Best,
Lindsay

Thank you very much for these instructions, Dr. Kim. The patient has now been discharged from the walk in clinic. I will be driving up to Snohomish County to transport the specimens back down to WA PHL

shortly. I am copying in the WA PHL Microbiology Office Director and our WA State Epidemiologist for Communicable Diseases.

I did not find **information about how to contact World Courier**. Did I miss that in the shipping instructions, or do you contact them for us once the specimens are ready for pick up? If not, will you please provide contact information.

Best regards,
Chas

Subject: RE: Washington State 2019 nCoV PU1

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version**. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC 10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PU1". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these**

specimens get collected properly and transported to CDC overnight. We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PU1

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PU1s. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6)

(b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Not totally sure difference between A and B, but preferred classification is UN3373 – Biological Substance. If we ship as UN2814 – Infectious Substance, it may be 2 or 3 days before it gets here.

Subject: Specimen Shipping: Washington State 2019 nCoV PUI

Hello all:

I just spoke with Brian Hiatt who gave me the contact information of the microbiologist who will hand off the specimens for 2019 nCoV testing to World Courier:

Jessica Gant
Cell: (b)(6)
Desk 206-418-5562
Address: 1610 NE 150th Street, Shoreline, WA 98155

The DOH has asked that World Courier call Ms. Gant on both phone lines as cell reception is poor in the lab when arranging pick-up.

Steve: The lab plans to ship these using Category A (b)(5) I let them know that guidance is Category B, but they said Category A is even "more secure"?

Thanks,
Lindsay

Hi Chas:

Thanks! I'd still request that we talk on the phone for further instructions about the packaging of the specimens to make sure we get this shipment right since it's a holiday weekend. Please let me know when we can speak with you and a POC who will be working with these specimens.

We will need the name and a phone number of the person who will actually handoff the specimens to World Courier. Once you have identified this person, please let me know, and CDC will then arrange shipment and provide more details to you.

Best,
Lindsay

Thank you very much for these instructions, Dr. Kim. The patient has now been discharged from the walk-in clinic. I will be driving up to Snohomish County to transport the specimens back down to WA PHL shortly. I am copying in the WA PHL Microbiology Office Director and our WA State Epidemiologist for Communicable Diseases.

I did not find **information about how to contact World Courier**. Did I miss that in the shipping instructions, or do you contact them for us once the specimens are ready for pick up? If not, will you please provide contact information.

Best regards,
Chas

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday\Sunday\Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each

specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab/biosafety_guidelines.html.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6). Thank you so much!

Best,
Lindsay

Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding

specimen transport from the provider's clinic to CDC. Website:

<https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.

- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI
Attachments: World Courier _ WA DOH.jpg

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6). Thank you so much!

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: SHIPPING INFO: Washington State 2019 nCoV PUI

Importance: High

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding

specimen transport from the provider's clinic to CDC. Website:

<https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.

- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:
Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.

- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each

specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6). Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all.

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) ago for work, who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know

Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:
Job number 3226CL
Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non influenza) CDC 10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PU1" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6)

(b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6)

(b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website. <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: SHIPPING INFO: Washington State 2019 nCoV PUI
Importance: High

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.html

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,

Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: Re: SHIPPING INFO: Washington State 2019 nCoV PUI

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday\Sunday\Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

I just called in the pickup to World Courier. WC should pick it up in about 1 to 2 hours. The package will catch a Delta flight around 10 pm or so from Seattle and land in ATL around 6 am or so. Delivery to CDC by around 8 am.

Subject: RE: Washington State 2019 nCoV PU1

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: WA: Local HD request to State HD - CDC medical consultant
Attachments: Medical consult request

Hi Sue:

Chas DeBolt (b)(6) with WA HD called me on my work mobile requesting a CDC Medical Consultant for the "managing physician" at the hospital where the WA case is hospitalized. This request was forwarded to her from the local HD, Snohomish County Health Department. Chas would like to give the local HD a name and number of a CDC POC that can assist. See attached.

I'm happy to reply to Chas with a name and phone number if one is identified, but if you'd like someone else to do that, please let me know. I just don't want this to be overlooked.

Best,
Lindsay

Subject: RE: [EXTERNAL] Framework for statement from Dr. Spitters

All, Casey spoke with our CMO. Dr. Cook is adamant that protecting the patient's privacy is paramount. As of now, we won't be announcing discharge. Let's plan to move forward with the plan for a joint media advisory at 10ish and a briefing at 12:30 at the health district. Casey and I will loop back with you all in the morning, and we can figure out how we're going to frame this.

To: Calamusa, Casey M <Casey.Calamusa@providence.org>; Webb, Adrienne L <Adrienne.Webb@providence.org>; Lisa M Stromme <lisa.stromme@doh.wa.gov>; Kristen Nordlund <hok4@cdc.gov>; Kari Bray <kbray@snohd.org>
Subject: [EXTERNAL] Framework for statement from Dr. Spitters

The patient no longer required hospitalization and will remain in isolation under close SHD supervision until released. All of this is occurring in coordination w DOH and CDC consultants and reflects best practices we routinely employ and that is appropriate for this situation. In the interest of the privacy of this fully cooperative individual, we decline to comment further.

Good Evening Field Team,

Thank you all again for your willingness to respond so quickly today!

We have attached several resources that I think you all will find useful for deployment. Please note that a lot of the information here can be used as a guide but will likely need to be modified for specific field investigations. It will be important to liaise with our HQ SMEs if there are questions.

In addition, I have put a table of everyone's contact information below. **Please confirm the contact information below is best for use in the field.** If not, please update us so we can send out a revised contact list. This contact list will be updated as additional officers join the team.

Ermias Belay will be serving as your HQ liaison.

Safe travels and please do not hesitate to reach out to our team for assistance.

Best,
Talia

Talia Pindyck, MD, MPH

Human Infection with SARS-CoV-2 Overview of Special Studies Case and Contact Investigation Toolkit

Background

The Centers for Disease Control and Prevention (CDC) is closely monitoring an outbreak of respiratory illness (referred to as COVID-19), caused by a novel coronavirus (SARS-CoV-2, formerly known as 2019-nCoV). The virus was first identified in Wuhan, Hubei Province, China in December 2019 and has since spread internationally. The first confirmed case in the United States was identified on January 21, 2020.

Purpose of Toolkit

The purpose of this toolkit is to provide state and local health departments with the data collection instruments and tools to assist with in-depth investigations of close contacts of cases with laboratory-confirmed SARS-CoV-2 infection. If a jurisdiction wishes to complete in-depth investigation of confirmed cases, please contact eocevent330@cdc.gov for more information. CDC has determined that these investigations are part of a public health response and do not require informed consent from participants; jurisdictions may need to make their own determinations regarding informed consent.

Case Investigation Overview

The components of investigations of laboratory-confirmed cases are described below. Please refer to the "Case Investigation Materials" folder for all related data collection instruments and tools.

1. Confirm that the case has a positive laboratory result for SARS-CoV-2.
2. Complete the *Person Under Investigation (PUI) and Case Report Form* as soon as possible, and ideally within 1 day of laboratory confirmation of infection and submit the data to CDC using instructions below.
3. Complete the in-depth *Case Report Form*.
4. Complete the *Case Exposure History Form* to identify the confirmed case's potential exposures in the 14 days prior to symptom onset.
5. Actively monitor the health of the confirmed case daily using the *Confirmed Case Symptom Monitoring Form*. Minimum recommended monitoring includes twice-daily temperature checks and a daily symptom log.
6. The specimen collection schedule among confirmed cases can be determined by the field team in consultation with CDC depending on resources available. Please contact the Epidemiology & Surveillance Team at eocevent330@cdc.gov for more information.
7. Consult the following guidance for [discontinuation of transmission-based precautions](#) and/or [discontinuation of in-home isolation](#).

Contact Investigation Overview

The components of investigations of close contacts of cases with laboratory confirmed SARS-CoV-2 infection are described below. Please refer to the "Contact Investigation Materials" folder for all related data collection instruments and tools to assist with these investigations.

1. Interview the confirmed case using the *Tool to Identify Close Contacts of a Confirmed Case* to identify close contacts. This interview should be completed as soon as possible, and ideally within 1 day of laboratory confirmation of infection.
 - Please refer to CDC guidance regarding risk assessment and public health management of persons with potential exposures to SARS-CoV-2 through [travel-associated](#) and [community settings](#) and [healthcare settings](#).

Human Infection with SARS-CoV-2 Overview of Special Studies Case and Contact Investigation Toolkit

2. Interview close contacts using the *Close Contact Questionnaire* as soon as possible, and ideally within 1 day of the identification of the contact.
3. Actively monitor the health of close contacts daily for 14 days since their last exposure to the confirmed case using the *Close Contact Symptom Monitoring Form*. Minimum recommended monitoring includes twice-daily temperature checks and a daily symptom log.
4. If the contact becomes symptomatic, refer to CDC's [Person Under Investigation website](#) for information about evaluating the contact for infection with SARS-CoV-2.
5. The specimen collection schedule among contacts can be determined by the field team in consultation with CDC depending on resources available. Please contact the Epidemiology & Surveillance Team at eocevent330@cdc.gov for more information.

Submitting Data to CDC

Transmit data from the *Person Under Investigation (PUI) and Case Report Form* and the *Case Follow-Up Form* to CDC via the [DCIPHER](#) platform as soon possible, unless alternative arrangements have been made with the CDC Epidemiology Task Force (eocevent118@cdc.gov, eocevent333@cdc.gov). Please contact eocevent118@cdc.gov with additional questions about how to transmit data to CDC.

Submitting Specimens to CDC for Laboratory Testing

Please refer to CDC's [guidance regarding the collecting, handling, and testing of clinical specimens for laboratory testing](#). Additionally, please review the supplemental specimen collection and submission guidance document located in the "Specimen Collection Materials" folder for detailed instructions about completing the specimen tracking forms and spreadsheets and how to submit these to CDC. Adhering to these guidelines will help prevent testing delays.

Please contact the Epidemiology and Surveillance Team at eocevent330@cdc.gov with questions.

47. Any additional comments or notes?

This is the end of the case report form. Thank you very much for your time. If you have any questions please feel free to contact the CDC at 770-488-7100 or eocreport@cdc.gov

Human Infection with SARS-CoV-2 Confirmed Case Symptom Monitoring Form

Form Approved OMB 0920-1011 Exp 4/23/2020
Version 7 February 20

State/Local Confirmed Case ID: _____

I. Confirmed Case Information

Confirmed case name: _____ DOB: _____

Parent/guardian name: _____

Phone number: _____

State/Local Confirmed Case ID: _____

Instructions for the confirmed case symptom monitoring diary

- 1) Please fill in the date of symptom onset below (i.e., the date when the confirmed case's symptoms started).
- 2) Beginning on the date of symptom onset or as soon as possible thereafter, use this form to record:
 - The date of active monitoring
 - The confirmed case's temperature in the morning (AM) and evening (PM)
 - Any symptoms the confirmed case experienced that day. If the confirmed case experienced no symptoms on the date of monitoring, please select "No symptoms."
 - Note: If the confirmed case could not be reached, please select "Unable to contact."
- 3) Please complete the form according to the determined active monitoring schedule.

Note: This form was designed to be flexible and can be completed by a state or local health department employee or a health care worker in the event that the confirmed case is hospitalized.

State/Local Confirmed Case ID: _____

Human Infection with Novel Coronavirus (SARS-CoV-2) **Tool to Identify Close Contacts of a Confirmed Case**

nCoV ID: _____

III. Household Contacts

Please complete the questions below for all household contacts from the date of illness onset through today's date. A household contact is anyone who stayed overnight for at least one night in a household with the confirmed case during the period of exposure.

Name	Phone Number	Relationship to case-patient	Sex (M/F/O/U)	Age	Date of last exposure to the case (MM/DD/YYYY)

Human Infection with Novel Coronavirus (SARS-CoV-2))

Tool to Identify Close Contacts of a Confirmed Case

Confirmed Case ID: _____

IV. Close Contacts

Please complete the table below for all non-household close contacts the confirmed case has had contact with from the date of illness onset through today's date. A close contact is defined as anyone besides a household contact who was in physical contact in the same indoor environment with the confirmed case.

Name	Location of Contact	Description of Contact	Phone Number (if known)	Sex (M/F/O/U)	Age	Date of last exposure to the case (MM/DD/YYYY)

Human Infection with Novel Coronavirus (SARS-CoV-2))

Human Infection with Novel Coronavirus (SARS-CoV-2) Close Contact Symptom Monitoring Form

State/Local Close Contact ID: _____

The purpose of this form is to track temperatures and symptoms of close contacts of confirmed cases with COVID-19 and assess whether they may need additional medical evaluation.

I. Close Contact Information

Close contact name: _____ Contact DOB: _____

Parent/guardian name: _____

Contact phone number: _____

Location where close contact is isolated: _____

Close contacts should be monitored for 14 days after their last exposure to a confirmed case with COVID-19. Active monitoring or self-monitoring may be appropriate based on the level of contact. Guidance for the type of monitoring that is recommended can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>

II. Prior Contact with Confirmed Case

State/Local Confirmed Case ID: _____

Confirmed Case Name: _____

Date of Last Exposure to Confirmed Case (MM/DD/YYYY): _____ N/A continued exposure¹

¹ Note: If the close contact under active monitoring has continued exposure to a confirmed case (e.g. if the close contact is isolated at home with a confirmed case), their risk should be assessed to determine their last date of exposure and the appropriate monitoring period. <https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>

Human Infection with Novel Coronavirus (SARS-CoV-2) Close Contact Questionnaire

Form Approved OMB 0920-1011 Exp 4/23/2020
Version 8 February 20

State/Local Close Contact ID: _____

Interviewer instructions: prior to interview with contact, please note the following information about the confirmed case that identified this contact:

Confirmed Case Last: _____ First: _____

Date of symptom onset: ____/____/____ (MM/DD/YYYY)

Date of last symptom: ____/____/____ (MM/DD/YYYY) ☐ Still symptomatic

Date of contact's last exposure to the confirmed case ____/____/____ (MM/DD/YYYY)
☐ Continued exposure

Interviewer information

Date interview completed: ____/____/____ (MM/DD/YYYY) Interviewer telephone: _____

Interviewer Name: Last: _____ First: _____ Organization/affiliation: _____

Who is providing information for this form?

☐ Contact ☐ Parent/guardian

☐ Other, specify name: _____ Relationship to contact: _____

Contact's primary language: _____ Was this form administered via a translator? ☐ Yes ☐ No

Close contact's information

Last Name: _____ First Name: _____

Current Address: _____ City: _____ State: _____ Zip: _____

Phone: _____ Is address the same as the case? ☐ Yes ☐ No

Human Infection with Novel Coronavirus (SARS-CoV-2) Close Contact Questionnaire

Form Approved OMB 0920-1011 Exp 4/23/2020
Version 8 February 20

State/Local Close Contact ID: _____

Close contact's demographic information

1. Date of birth: ____/____/____ (MM/DD/YYYY)
2. Age: ____ ☐ years ☐ month ☐ days
3. Ethnicity: ☐ Hispanic/Latino ☐ Non-Hispanic/Latino ☐ Not Specified
4. Race: ☐ White ☐ Asian ☐ American Indian/Alaska Native ☐ Black ☐ Native Hawaiian/Other Pacific Islander
☐ Other, specify: _____ ☐ Unknown
5. Sex: ☐ Male ☐ Female ☐ Unknown ☐ Other

Symptoms

6. Since your date of last exposure to the confirmed case, have you experienced any of the following symptoms?

Symptom	Symptom Present?	Date of Onset (MM/DD/YYYY)	Duration (no. of days)
Fever >100.4F (38C)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Subjective fever (felt feverish)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Chills	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Muscle aches (myalgia)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Runny nose (rhinorrhea)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Sore throat	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Cough (new onset or worsening of chronic cough)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Shortness of breath (dyspnea)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Nausea/Vomiting	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Headache	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Abdominal pain	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Diarrhea (≥3 loose/looser than normal stools/24hr period)	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		
Other, specify:	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unk		

Past Medical History

7. Do you have any pre-existing medical conditions? ☐ Yes ☐ No ☐ Unknown

Chronic Lung Disease (asthma/emphysema/COPD)	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Diabetes Mellitus	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Cardiovascular disease	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Chronic Renal disease	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Chronic Liver disease	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Immunocompromised Condition	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	

Human Infection with Novel Coronavirus (SARS-CoV-2) Close Contact Questionnaire

Form Approved OMB 0920-1011 Exp 4/23/2020
Version 8 February 20

State/Local Close Contact ID: _____

Neurologic/neurodevelopmental disorder	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	(If YES, specify) _____
Other chronic diseases	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	(If YES, specify) _____
If female, pregnant	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Current smoker	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	
Former smoker	<input type="checkbox"/> Yes	<input type="checkbox"/> No	<input type="checkbox"/> Unknown	

Exposures to confirmed case

10. What is your relationship to the confirmed case? (select all that apply)

- | | |
|---|---|
| <input type="checkbox"/> Spouse/Partner | <input type="checkbox"/> Healthcare Worker |
| <input type="checkbox"/> Child | <input type="checkbox"/> Co-worker |
| <input type="checkbox"/> Parent | <input type="checkbox"/> Classmate |
| <input type="checkbox"/> Other Family | <input type="checkbox"/> Roommate |
| <input type="checkbox"/> Friend | <input type="checkbox"/> Other (specify): _____ |

11. Where were you exposed to the confirmed case? (select all that apply)

- ☐ Household
- ☐ Healthcare setting
- ☐ Work
- ☐ Daycare
- ☐ School/University
- ☐ Transit
- ☐ Rideshare
- ☐ Hotel
- ☐ Community
- ☐ Other (specify): _____

12. During the period of **potential exposure** (defined as the confirmed case's date of symptom onset through your date of last contact with the confirmed case), did you.....?

Exposure	Answer	Start date (date exposure first occurred) (MM/DD/YYYY)	End date (date exposure last occurred) (MM/DD/YYYY)	Number of occurrences (number of times the exposure occurred)	Total cumulative duration of occurrence(s) (specify unit)
...have face to face contact with the confirmed case?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown				<input type="checkbox"/> minutes <input type="checkbox"/> hours <input type="checkbox"/> days

GUIDELINES FOR SUBMITTING SPECIMENS TO CDC FOR LABORATORY TESTING FOR SARS-CoV-2

This document provides supplemental guidance regarding specimen collection, storage, and shipping to CDC laboratories in addition to the guidance available on CDC's website regarding [infection prevention and control in healthcare settings](#), [biosafety for specimen handling](#), and [specimen collection and storage](#).

SPECIMEN LABELING AND DOCUMENTATION

All specimens must be labeled with:

- Patient (or contact) date of birth
- Specimen ID: Use nCoV ID (formerly "PUI ID") in Alternative Patient ID field
- Specimen type identifier: Use nCoV ID-specimen type in Alternative Specimen ID field (NP = nasopharyngeal swab, OP = oropharyngeal swab). If there are multiple of the same specimen type, please label them sequentially (e.g. nCoV ID-NP1, nCoV ID-NP2).

Please submit all specimens through the State Public Health Laboratory. All results will be reported from the Respiratory Viruses Diagnostic Laboratory to the State Public Health Laboratory via the Enterprise Laboratory Information Management System (ELIMS).

Each specimen should be accompanied by a completed CDC Form 50.34 (also known as a DASH form) or Global File Accessioning Template (GFAT) form. DO NOT fill form in by hand. Drop downs MUST be used if they exist. A copy of the 50.34 form is available at: <https://www.cdc.gov/laboratory/specimen-submission/pdf/form-50-34.pdf>. A copy of the GFAT is available from the novel Coronavirus Epi Investigations Team (eocevent330@cdc.gov). **The patient information on the specimen tube and DASH Form 50.34/GFAT must match exactly to prevent delays.**

- Please include the 50.34 or GFAT in the package and send a secure email with the 50.34 or GFAT to Marla Petway (vtw6@cdc.gov), Dennis Bagarozzi (zbg7@cdc.gov), DSRstat@cdc.gov
- Please email a copy of a de-identified specimen shipping manifest to the novel Coronavirus Epi Investigations Team Inbox (eocevent330@cdc.gov). This should include at a minimum: Original Submitter Patient ID, Original Submitter Specimen ID, SPHL Alternative Patient ID, SPHL Alternative Specimen ID, Sample Type, Date of Collection, patient type
- Please note in the body of the emails any specimen IDs coming from a lab-confirmed case or any other PUI specimens requiring priority testing.

Please make sure the nCoV IDs (formerly known as PUI IDs) are included in the State PHL Alternative Patient and Specimen ID fields indicated below

Select the Specimen Origin to Begin the Form

☒ HUMAN **CDC SPECIMEN SUBMISSION FORM: SPECIMENS OF HUMAN ORIGIN**

PATIENT INFORMATION Patient Name Birth date Sex Age Age Units Clinical Diagnosis Date of onset Pregnancy Status Date of Death	Case ID Patient ID Specimen ID Alternative Patient ID Alternative Specimen ID

State Public Health Lab Patient ID

nCoV ID

State Public Health Lab Specimen ID

nCoV ID - Specimen type Identifier

On the 50.34 or GFAT, please include or select the following for these fields depending on if specimens come from confirmed cases. PUI guidelines are included in this table for easy reference and comparison.

Field Name	PUI*	Serial Case	Asymptomatic
Test Order Name	"Respiratory virus molecular detection (non-influenza) "	"Respiratory Virus (Non-Influenza) Case Follow-up"	"Respiratory Virus (Non-Influenza) Special Study"
State of illness	Symptomatic	Symptomatic	Asymptomatic
Suspected Agent	2019 Novel Coronavirus	2019 Novel Coronavirus	2019 Novel Coronavirus
STATE PHL Alternative Patient ID* <i>*Even if submitting lab is not SPHL</i>	Please use the nCoV ID (previously called CDC PUI ID)	Please use the nCoV ID (previously called CDC PUI ID)	CDC nCov CONTACT ID preceded by "CONTACT" Ex: CONTACT<<contact ID>>
STATE PHL Alternative Specimen ID* <i>*Even if submitting lab is not SPHL</i>	Please use the nCoV ID - specimen type identifier (NP = nasopharyngeal swab, OP = oropharyngeal swab)	Please use the nCoV ID - specimen type identifier (NP = nasopharyngeal swab, OP = oropharyngeal swab); If there are multiple of the same specimen type please label them sequentially (e.g. <<nCoV ID>>-NP1, <<nCoV ID>>-NP2)	Please use the Contact ID with a specimen type identifier (NP = nasopharyngeal swab, OP = oropharyngeal swab); If there are multiple of the same specimen type please label them sequentially (e.g. <<contactID>>-NP1, <<contactID>>-NP2)

Complete *all* fields of the GFAT/50.34 electronically. In addition to the fields above, please be sure to include the following:

- Patient first name and last name
- Patient date of birth
- Original Submitter Patient ID
- Original Submitter Specimen ID
- State Public Health Laboratory Patient ID
- State Public Health Laboratory Specimen ID
- State Public Health Laboratory contact information including full name, title, complete mailing address, email address, telephone, and fax number of the submitter
- Specimen collected date
- Specimen source (type)

SHIPPING SPECIMENS ON WEEKDAYS AND WEEKENDS

Specimens can be received at CDC seven days a week, but the specific instructions below should be followed for weekend deliveries in order to ensure receipt.

When shipments are going out on Monday – Thursday, ship overnight using your usual courier such as FedEx or UPS to the following address:

**ATTN: STATT Lab: COVID 2019
Centers for Disease Control and Prevention
1600 Clifton Road, NE**

Atlanta, Georgia, 30333
Telephone: 404-639-3931
Email: dsrstat@cdc.gov

If shipments are going out Friday, Saturday, or Sunday or holidays:

- The designated shipping point of contact should collect the following information:
 - Name and contact information for the person who will be handing the package to the courier
 - Address of where the package will be picked up
 - Estimated time the package will be ready
 - Number, rough dimensions, and rough weight of the package(s)
 - Whether package contains cold pack, dry ice, or other
 - CDC nCoV ID
- Next, the shipping point of contact should email the above information to CDC IMS Logistics Transportation (eocevent306@cdc.gov) and CDC IMS Logistics Section Chief (CDC) (eoeclogchief@cdc.gov)
- Then the shipping point of contact should call the CDC Emergency Operations Center (770-488-7100) to arrange weekend-specific overnight specimen logistics. Please indicate that the call is about coronavirus specimen shipping and please have the CDC nCoV ID number.
- CDC EOC shipping staff will contact the person handing off the package to provide the details for how and when the courier will pick up the package.

Please email the CDC laboratory staff (respvirus@cdc.gov) and the Novel Coronavirus Response Laboratory Task Force (eocevent177@cdc.gov) the shipping information, including the sender's name on the shipping label and the tracking number, and copy the PUI Team (eocevent185@cdc.gov) and the Epidemiology and Surveillance Team (eocevent330@cdc.gov)

PREPARING SPECIMENS FOR SHIPMENT

Specimens should be packed according to [International Air Transport Association \(IATA\) regulations](#). SARS-CoV-2 specimens should be packed in compliance with regulations for [UN3373 Biological Substance, Category B](#). A [packaging checklist](#) is available for reference. For specific instructions, refer to CDC's [Packing, Shipping, and Transport guidance](#) (last section).

For Domestic Shipping:

If samples are unable to be shipped within 72 hours of collection, specimens should be stored at -70°C and shipped on dry ice. Otherwise, specimens can be stored at 2-8°C and shipped on ice packs.

For International Shipping:

When shipping a frozen specimen from long distances or from international locations, it is best to use a combination of dry ice and frozen gel ice-packs. The gel ice-packs will remain frozen for 1-2 days after the dry ice has dissipated. Shipments from outside of the United States may require an importation permit that can be obtained from the CDC.

Some things ***not to do***:

- Do not place any dry ice in the "Primary Container" or "Secondary Container", foam envelopes, ziplock bags, cryovial boxes, or hermetically sealed containers.
- Do not place Primary Containers sideways or upside down in ziplock bags.
- Do not place any paperwork in the Secondary Containers or ziplock bags, so as not to damage the paperwork.
- Do not use biohazard/autoclave bags to prepack your materials due the inadequate seal of these bags.

Version 1.1, February 22, 2020

The document you are trying to load requires Adobe Reader 8 or higher. You may not have the Adobe Reader installed or your viewing environment may not be properly configured to use Adobe Reader.

For information on how to install Adobe Reader and configure your viewing environment please see http://www.adobe.com/go/pdf_forms_configure.

Disclaimer:

The Centers for Disease Control and Prevention (CDC), an agency of the Department of Health and Human Services, is authorized to collect this information, including the Social Security number (if applicable), under provisions of the Public Health Service Act, Section 301 (42 U.S.C. 241). Supplying the information is voluntary and there is no penalty for not providing it. The data will be used to increase understanding of disease patterns, develop prevention and control programs, and communicate new knowledge to the health community. Data will become part of CDC Privacy Act system 09-20-0106, "Specimen Handling for Testing and Related Data" and may be disclosed to appropriate State or local public health departments and cooperating medical authorities to deal with conditions of public health significance; to private contractors assisting CDC in analyzing and refining records; to researchers under certain limited circumstances to conduct further investigations; to organizations to carry out audits and reviews on behalf of HHS; to the Department of Justice in the event of litigation; and to a congressional office assisting individuals in obtaining their records. An accounting of the disclosures that have been made by CDC will be made available to the subject individual upon request. Except for permissible disclosures expressly authorized by the Privacy Act, no other disclosure may be made without the subject individual's written consent.

Please refer to the CDC Infectious Diseases Laboratories Test Directory for information on specimen requirements. CDC must maintain and document specific acceptance criteria to perform laboratory tests on samples obtained from humans pursuant to the Clinical Laboratory Improvement Amendments of 1988 (CLIA) and accompanying regulations. 42 U.S.C. § 263a, 42 C.F.R. § 493.1241.

Samples transferred to the CDC for testing or any other purpose will become the legal property of the agency unless otherwise agreed upon in writing. Samples will not be returned to the submitting entity.

Introduction:

File Accessioning is a feature of ELIMS which allows the User to accession one or more specimens into ELIMS as a single operation using the "File Accessioning" interface. The User simply creates a "File Accessioning" import file from the Global File Accessioning Template (GFAT) and uses the "File Accessioning" function to load the specimen data from the import file into ELIMS. The "File Accessioning" import file contains the same data that may be entered manually or through barcode accessioning by the User using the CDC Specimen Submission Form (Form 50.34). The "File Accessioning" function runs in the background, and an email is sent to the User when the import is completed.

Production Version: 4.1

What is a template/import file?

The File Accessioning process extracts specimen data from an import file and loads the data into ELIMS. The User creates the import file by, first, entering the specimen data into the "File Accessioning" template (Excel worksheet), which contains the same data the User enters when accessioning specimens one at a time [using the ELIMS Login/Sample Login interfaces or the CDC Specimen Submission Form (Form 50.34)]. After the User enters the specimen data into the "File Accessioning" template, the Excel worksheet (.xlsx) can be imported into ELIMS.

Using this template:

1. This file contains three "File Accessioning" templates (Excel worksheets): Human, Animal, and FEMB (Food, Environmental, Medical Devices, and Biologics). Select the appropriate accessioning template based on the origin of each specimen. The file can contain specimens in each "Origin" tab if you are accessioning multiple origins, and it is saved and imported as an Excel file.
2. Row #1 contains the data captions on the CDC Specimen Submission Form (Form 50.34). This row should not be altered by the User for any reason. Row #2 contains the database field names that correspond to the data captions in Row #1. This row is hidden and must not be altered by the User for any reason. Editing values in this row will corrupt the import file. Row #3 (and each row following) is used to enter data for specimens. Each row of information represents a new specimen or aliquot record for a specimen that is being imported. The following fields are required; however, these fields are auto-populated if left blank.
 - Package ID – Blank, if not specified
 - CSID – Auto-populated, if not specified
 - CUID – Auto-populated, if not specified
 - Origin – Valid values are: "Human," "Animal," "Food," "Environmental," "Medical Device," or "Biologic." Origin is required and a value must be entered
 - Test order name – Blank, if not specified
3. Picklists are used for many of the cells within each template (Excel worksheet). These lists contain the same values in the CDC Specimen Submission Form (Form 50.34).
4. After the User enters all of the specimen data into the "File Accessioning" template (.xlsx), the Excel worksheet is saved and ready for ELIMS import. The import is only compatible with Excel files, and a single import file can have specimen data in each of the worksheet tabs (Human, Animal, and FEMB).

5. Specifying specimens, aliquots, and subsamples.

- Each row containing a blank or unique CSID value will be a new specimen
- Aliquots will be created for each row with an existing CSID in the current GFAT and a unique or blank CUID
- The GFAT cannot create subsamples (derivates). To batch create subsamples in ELIMS, use the SALT file found in ELIMS → File Bulk Processing → "Add Subsample/Aliquot" tab.

NOTE: If creating a child aliquot in the GFAT, the parent will be the first instance of the specimen's CSID in the file. ELIMS will not let you create a GFAT containing a CSID that already exists in the system. To batch create aliquots for specimens already in the system, use the SALT file.

6. "FastLookup" tab and "Short List" checkboxes - The "Short List" checkboxes are a way to tailor the "File Accessioning" template to ensure the available picklist fields only list the subset of values the laboratory most frequently uses. To set up this feature, perform the following steps.

- Go to the "FastLookup" tab within the spreadsheet
- Locate the desired picklist name for customization. The field title will show the correct name
- Select the desired picklist values from the drop-down menu for the specific field. Do not leave any blank columns between the picklist rows.
- To see the full list of values for a picklist, leave the "Short List" checkbox in the "Title" row blank when entering the data. To view the sublist, check the box.

7. Some of the "Storage Location" fields (Room, Freezer, Shelf, Rack, and Box) have drop-down menus with no picklist values. Storage Locations can be manually typed into these fields. Alternatively, "Storage Location" information can be added by laboratories into the "Storage Location" section of FastLookup. This allows the User to choose the storage location within the associated fields of the "Origin" tabs using the drop-down menus. This will decrease the number of data entry errors when importing into storage locations. To add a laboratory's storage location information into ELIMS, perform the following steps.

- Go to QBE Query in ELIMS
- Choose the QBE template "Storage Locations Metadata."
- Choose the filter set "General."
- Query all storage locations

Use the list from QBE to populate the storage locations in FastLookup. Make sure the "Storage Location" types from the QBE match the locations in FastLookup (boxes appearing within the box section, shelves in the shelf section, etc.).

- Once the Storage Locations are added to the GFAT, save it as a template to ensure easy access to location information when creating an import file.

8. Copying and pasting values - It is possible to copy and paste values into the GFAT spreadsheet. If a value pasted into the picklist doesn't match one of the existing picklist records, that field will appear in red. Users need to change the field value to a valid ELIMS format or the file will fail during accessioning. When copying and pasting into the GFAT from an Excel file that has existing formatting or calculations, only try to paste values only (or this may overwrite the existing GFAT formatting rules). Please contact the ELIMS Support Services Team if you have any questions at STARR-MS@cdc.gov.

9. To assign a specimen to an SPHL, the SPHL ID must be specified. To determine the SPHL ID value, the "SPHL Institution Name" field has been added to the top of the GFAT file in the "SPHL" section. When the SPHL name is chosen, the corresponding SPHL ID will appear next to it. This field is for informational use, and the SPHL ID will still need to be populated in the specimen row in order to be imported into the specimen record.

10. To simplify assigning the SPHL ID to a specimen, an "SPHL Institution Name" field is included in the GFAT file next to the "SPHL ID" field. This field contains a list of all SPHLs in ELIMS. To use, perform the following steps.

- Select the SPHL name from the "SPHL Institution Name" field in a row within the GFAT
- Select the drop-down menu next to the "SPHL ID" field—the corresponding SPHL ID for the selected institution will appear
- Select the SPHL ID.

NOTE: Even though the SPHL name is selected, the User MUST still select a SPHL ID for it to be populated for the specimen during import.

11. The "Event ID" drop-down menu is used to simplify the Event ID selection process using the laboratory's ELIMS list of events. This will only work if the laboratory is assigning the specimen to a single event. Perform the following steps.

- Go to Events Management in ELIMS
- Right click on the "Events Management" screen and select "Copy to Excel"
- Select the "Event ID" and "Event Name" fields and copy them. If you use a different field (such as "Local Event ID") to identify events, it can be used instead of "Event Name."
- Go to the "FastLookup" tab in the GFAT file and paste these values in the "Event ID"/"Event Name" fields.
- To assign an event to the GFAT file, go to the appropriate row and select the event name. This will filter the record to the correct Event ID.

NOTE: You must still select the Event ID for the record to be assigned to the event.

Importing a GFAT file into ELIMS.

1. Navigate to the "File Accessioning" interface by selecting the "File Accessioning" link in the "Login Options" section of ELIMS.
2. Prepare the GFAT import file. Ensure the file is the most current version (to check the version, select the "Download Global File Accessioning Template" link found in the "File Accessioning" interface).
3. Select the "Import" button on the "File Accessioning" screen.
4. Select the GFAT file for import.
5. Select "Current user" in field titled "When import completes send email to." Next, select the "Import" button. This will cause the "Batch Import" message to appear.
6. Select "OK" on the "Batch Import" message. The User will receive a notification email indicating the import is complete. This process usually occurs quickly, but timing is dictated by the number of specimens being imported.
7. Review the email for the imported batch.
8. Return to the "File Accessioning" interface and select the "Filter By Status" picklist. Select "Passed" from the filter. The User will see the batch of the file that was imported.
9. Go to the "Sample Login" screen. Specimens imported through File Accessioning will appear in the Specimen List.

Subject: Re (time sensitive) WA lab result?

Hi Bill and Steve,

I am an on call med epi for nCoV. Last night around midnight a WA state health official called me for results on a 1/23 PUI specimen. PUI is a (b)(6) national, now asymptomatic, who was only in (b)(6) and low suspicion. Her (b)(6) in Seattle has her in isolation and wants to release her if her test is negative. Unfortunately I didn't get her ID because state officer didn't have it on hand. Do you have a result ready today that we can give her? State POC is Chas Debolt (b)(6) Sooner the better if possible to facilitate PUI's return to (b)(6)

Thanks,
Maureen Miller

Subject: WA State DoH Request for Information (RFI) - Need HL7 Lab Work Around for PHL Results
Importance: High

Hi Lab TF –

Joe Merlino here. I am a CDC Liaison Officer to the WA State DOH Incident Team as they manage the virus response here in Seattle. The state POOC is below:

PHL Manager: Mr. Denny Russell – 206.418.5572 email:
denny.russell@doh.wa.gov

Request for Information is as follows:

WA State PHL LIMS does not have the HL7 protocol enabled.

They want to know how can they transmit lab results to you as they ramp up for specimen testing in order to share the results?

A work around they suggest is using their Epi-Surveillance system that does have HL7 capability to send reports to you in a timely manner.

-

In order to do that though, they need and IT to IT consult to make that approach work successfully.

If CDC cannot accommodate that approach, then they need to know what resource they need to procure to make their LIMS capable of transmitting HL7 code.

Thanks in advance – looking forward to a timely interim reply today in order to satisfy this ask. As you know WA State has a confirmed case. WA State has already ordered the new diagnostic machines needed and reagents based upon your

great leading work on the CDC portal for the. They very much appreciate you leaning forward.

Best regards,

Joe

Subject: WA State DoH Request for Information (RFI) - Return of CAT-B Shipping Containers
Importance: High

Hi Lab TF –

Joe Merlino here. I am a CDC Liaison Officer to the WA State DOH Incident Team as they manage the virus response here in Seattle. The state POC is below:

PHL Manager: Mr. Denny Russell – 206.418.5572 email:
denny.russell@doh.wa.gov

Request for Information is as follows:

WA State PHL has a total of 56 CAT-B containers for lab specimen shipping to CDC. They have sent 14 containers to CDC during this response and NONE have been returned per normal protocol.

-

They want to know if CDC intends to return those containers per normal procedure or if due to the volume CDC recommends the PHL purchase more and note the emergency no returns.

Thanks in advance – looking forward to a timely reply in order to satisfy this ask. As you know WA State has a confirmed case. WA State has already ordered the new diagnostic machines needed and reagents based upon your great leading work on the CDC portal for the. They very much appreciate you leaning forward.

Importance: High

Hi Marla,

See email below from WA state DoH. Can you please let me know when/if the containers are going back?

Thanks,

Will

Subject: WA State DoH Request for Information (RFI) - Return of CAT-B Shipping Containers
Importance: High

Hi Lab TF –

Joe Merlino here. I am a CDC Liaison Officer to the WA State DOH Incident Team as they manage the virus response here in Seattle. The state POC is below:

PHL Manager: Mr. Denny Russell – 206.418.5572 email:
denny.russell@doh.wa.gov

Request for Information is as follows:

WA State PHL has a total of 56 CAT-B containers for lab specimen shipping to CDC. They have sent 14 containers to CDC during this response and NONE have been returned per normal protocol.

-
They want to know if CDC intends to return those containers per normal procedure or if due to the volume CDC recommends the PHL purchase more and note the emergency no returns.

Thanks in advance – looking forward to a timely reply in order to satisfy this ask. As you know WA State has a confirmed case. WA State has already ordered the new diagnostic machines needed and reagents based upon your great leading work on the CDC portal for the. They very much appreciate you leaning forward.

Best regards,

Joe

Joe Merlino, MHA

Satish,

We have run the new assay here in house. We are seeing an issue with the N3 showing amplification late in the NTC and the HSC. We received all reagents today, aliquoted them out and did a test run with HSC extractions only from two different analyst's. Staff followed the normal protocol of capping NTC, HSC and then positive controls. We do perform the PCR master mix and template addition in different rooms with correct directional workflow. I had the run repeated and the NTC and HSC showed amplification late. As well we used new aliquots of reagents to ensure that there was no cross contamination from the first run. I have attached screen shots of the results and amplification plot.

Thoughts?

Cheers,
Denny

Subject: Washington State 2019 nCoV PUI

Hello

I received a phone call from Chas Debolt (chas.debolt@doh.wa.gov, cell (b)(6) home (b)(6) office 206-418-5431), WA Department of Health this afternoon.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) per MD. 2 NP swabs were taken, 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6).

Given clinical history and epidemiologic link, this patient **does meet the criteria for 2019 nCoV person under investigation (PUI)**. Next steps recommended to Ms. Debolt:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible)
2. Please fill out the nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here https://www.cdc.gov/coronavirus/2019-ncov/guidance_home_care.html and https://www.cdc.gov/coronavirus/2019-ncov/guidance_prevent_spread.html. The local HD will monitor the patient.
5. Provider at clinic was recommended to implement standard, contact, airborne precautions and wear eye protection with the patient. Patient to continue face mask.

Thank you,
Lindsay

While I doubt this patient is infectious - If we are going strictly by the criteria we have used, need the NP result for Feb 10th. If negative, then has fulfilled the criteria.

Marc, Tim –

I too am hopeful that this series of results will allow the patient to be released – it is promising to see the 2/4, 2/10 and 2/14 results. Overall, this all seems quite reassuring. Of note, these are not official, but verbal reports. Did they come straight from the lab team? I know Wendi had been discussing that topic recently.

Subject: Re: Case follow up and release from isolation (Snohomish Co, WA)

Hi, Holly.

I got word over the weekend from DOH duty officer on the following:

04 Feb nasal specimen: neg

10 Feb OP specimen: neg

10 Feb NP specimen: no result reported (processed but not reported to us? not processed yet? didn't arrive?)

14 Feb OP specimen: neg

14 Feb NP specimen: neg

Thanks for anything and everything you and the CDC team did to expedite these most recent results.

See attached spreadsheet that Chas DeBolt started and I have updated for full set of results.

Now 31 days post onset, 17 days post hospital discharge, afebrile for over two weeks, no cough for about a week.

I would like to let him out of isolation and permit him return to normal activities. Any dissenting voices?

Thanks for all of your help,
Chris

Hi Chris,

Thank you for the update. I'm really glad to hear that he is feeling so much better, and definitely appreciate that he feels ready to get back to his usual routine. He has been impressively patient and cooperative throughout this process. I'm also glad the Harborview team was able to help out with the logistics!

Please do let me know when/if the specimens are on the way to CDC, and I will do my best to request that they be expedited.

Thank you,

Holly

To: Watson, John (CDC/DDID/NCIRD/DVD) <acq4@cdc.gov>
Subject: FW: Case follow up and release from isolation (Snohomish Co, WA)

FYI – result should be forwarded from lab to WA DOH soon. Does there need to be additional discussion with the case tracking team? Can you tell me who that is again?

Thanks,
Holly

While I doubt this patient is infectious - If we are going strictly by the criteria we have used, need the NP result for Feb 10th. If negative, then has fulfilled the criteria.

Marc, Tim –

I too am hopeful that this series of results will allow the patient to be released – it is promising to see the 2/4, 2/10 and 2/14 results. Overall, this all seems quite reassuring. Of note, these are not official, but verbal reports. Did they come straight from the lab team? I know Wendi had been discussing that topic recently.

Subject: Re: Case follow up and release from isolation (Snohomish Co, WA)

Hi, Holly.

I got word over the weekend from DOH duty officer on the following:

04 Feb nasal specimen: neg

10 Feb OP specimen: neg

10 Feb NP specimen: no result reported (processed but not reported to us? not processed yet? didn't arrive?)

14 Feb OP specimen: neg

14 Feb NP specimen: neg

Thanks for anything and everything you and the CDC team did to expedite these most recent results.

See attached spreadsheet that Chas DeBolt started and I have updated for full set of results.

Now 31 days post onset, 17 days post hospital discharge, afebrile for over two weeks, no cough for about a week.

I would like to let him out of isolation and permit him return to normal activities. Any dissenting voices?

Thanks for all of your help,
Chris

Subject: RE: Case follow up

Hi Chris,

Thank you for the update. I'm really glad to hear that he is feeling so much better, and definitely appreciate that he feels ready to get back to his usual routine. He has been impressively patient and

cooperative throughout this process. I'm also glad the Harborview team was able to help out with the logistics!

Please do let me know when/if the specimens are on the way to CDC, and I will do my best to request that they be expedited.

Thank you,
Holly

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible) Attached are the submission guidelines for specimens and DASH forms I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6). Thank you so much!

Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)
(b)(6) Thank you so much!

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each

specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab/biosafety-guidelines.htm>.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6) Thank you so much!

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding

specimen transport from the provider's clinic to CDC. Website:

<https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.

- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)
(b)(6) Thank you so much!

Best,
Lindsay

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI
Attachments: World Courier _ WA DOH.jpg

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,

Lindsay

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,

Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday\Sunday\Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding

specimen transport from the provider's clinic to CDC. Website:

<https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.

- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6)

Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:
Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Importance: High

Dear Gary and Joe:

I spoke with Brian Hatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.

- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)
(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each

specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or 678-347-5213. Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quick y

Best,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50-34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory

virus molecular detection (non-influenza) CDC-10401" and 2) for At CDC, bring to the attention of enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion

at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all.

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: SHIPPING INFO: Washington State 2019 nCoV PUI
Importance: High

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding

specimen transport from the provider's clinic to CDC. Website:

<https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.

- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know

Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:
Job number 3226CL
Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: RE: SHIPPING INFO: Washington State 2019 nCoV PUI

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

I just called in the pickup to World Courier. WC should pick it up in about 1 to 2 hours. The package will catch a Delta flight around 10 pm or so from Seattle and land in ATL around 6 am or so. Delivery to CDC by around 8 am.

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1: (b)(6)

Cell #2: (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non influenza) CDC 10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6)

(b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6)

(b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website. <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Subject: Re: SHIPPING INFO: Washington State 2019 nCoV PUI

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

I just called in the pickup to World Courier. WC should pick it up in about 1 to 2 hours. The package will catch a Delta flight around 10 pm or so from Seattle and land in ATL around 6 am or so. Delivery to CDC by around 8 am.

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.html

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,

Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:
Job number 3226CL
Tracking Number (b)(6)

Attached is a photo of the WayBill

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,
Lindsay

Subject: RE: Washington State 2019 nCoV PU1

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: SHIPPING INFO: Washington State 2019 nCoV PUI
Importance: High

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1 (b)(6)

Cell #2. (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.html

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary - do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly

Best,
Lindsay

Hi Chas:

I got some clarification about those instructions about specifying Saturday\Sunday\Holiday arrival at the main CDC gate from our CDC lab/epi colleagues. Those are NOT needed given these special circumstances. CDC will be revising that document to reflect this change.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory

virus molecular detection (non-influenza) CDC-10401" and 2) for At CDC, bring to the attention of enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15,

2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary - do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:

Job number 3226C1

Tracking Number (b)(6)

Attached is a photo of the WayBill

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday\Sunday\Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PU1

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6). Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday\Sunday\Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

I just called in the pickup to World Courier. WC should pick it up in about 1 to 2 hours. The package will catch a Delta flight around 10 pm or so from Seattle and land in ATL around 6 am or so. Delivery to CDC by around 8 am.

Dear Gary and Joe:

I spoke with Brian Hiatt with the Washington DOH just now. The specimens are en route to the PHL right now and should be ready for pick-up in 30 minutes. Please go ahead and start the World Courier process.

PLEASE NOTE THE CHANGE IN WA PHL POC FOR PICK UP:

Ryan Medeck

Cell #1 (b)(6)

Cell #2 (b)(6)

Address: 1610 NE 150th Street, Shoreline, WA 98155

I have asked Brian to send me an email once the specimens have been transferred to World Courier.

Thank you,

Lindsay

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.

- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here:
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and
<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Subject: RE: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.html

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,

Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6), who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary -- do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub-contract courier?

Shipping information:

Job number 3226CL

Tracking Number (b)(6)

Attached is a photo of the WayBill.

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Gary,

Shipping instructions sheet Dr Kim sent states that we should make sure shipping instructions specify as Saturday/Sunday/Holiday arrival at the main CDC gate. How do we do that? Tell the person who picks it up, or write it on the package? Both? Please advise.

(Ryan Medeck who will meet the courier is copied.)

Thanks,

Chas DeBolt

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.html

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,

Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)
(b)(6) Thank you so much!

Best,
Lindsay

Funny....I was just on the phone with WC checking on both shipments. All is well with both. The package from L.A. should be landing at ATL airport around 10:30 tonight and delivered to CDC around 12:30 or 1. I called CDC Security and they said the package will be put in the bldg. 18 STAT lab. I know Joe called Security earlier, but I called again. It was the first the Security guard had heard of the incoming package. The package from WA is going to catch a flight in Seattle in a few hours and land in ATL around 6:30 am tomorrow. Should be at CDC around 8:30 am. I will monitor.

Subject: UPDATE SPECIMEN SHIPPING 1/19/20: Washington State 2019 nCoV PUI

Dear all:

I just spoke with Brian Hiatt with WA DOH. The specimens have been passed to a sub-contract courier for World Courier. They are supposed to be delivered tomorrow, Monday, 1/20/20, but the DOH was instructed by the sub-contract carrier to call World Courier to ensure that these would indeed be delivered tomorrow to CDC. DOH called and are awaiting call back after reaching World Courier's answering service. They will let me know when they have reached World Courier.

Gary do you have a World Courier POC to ensure that these indeed will be overnighted to CDC, or perhaps this step isn't even needed since it was a sub contract courier?

Shipping information:
Job number 3226CL
Tracking Number (b)(6)

Attached is a photo of the WayBill

Thank you to all, especially to our WA DOH colleagues for getting these specimens sent to CDC so quickly.

Best,
Lindsay

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. This was recently updated in December 2019, so please make sure to use the correct version. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

CDC RESPIRATORY VIRUS DIAGNOSTICS PROGRAM

SPECIMEN SUBMISSION GUIDELINES

The Respiratory Virus Diagnostic Program, located within Division of Viral Diseases, Centers for Disease Control and Prevention (CDC), is responsible for the detection and identification of respiratory viruses (non-influenza), including respiratory syncytial virus, human parainfluenza viruses 1-4, human metapneumovirus, adenovirus, rhinovirus, coronavirus (including SARS-coronavirus and MERS) and human bocavirus. Diagnostic testing for human parvovirus B19 is also available on a limited basis. The successful diagnosis of respiratory virus infections depends on the timing of specimen collection, the type and quality of specimen collected, the conditions of storage and the prompt transport of the specimen to the CDC laboratory. Useful information on how to investigate a respiratory outbreak, including sample data collection forms can be found at: <http://emergency.cdc.gov/urdo/index.asp>

Prior to submitting any specimens, consultation is required

SAFETY NOTE

Health care personnel collecting clinical samples from potentially infectious patients should follow standard precautions and all pertinent biosafety guidelines. Sample processing should be performed in at least a Class II biological safety cabinet following a minimum of biosafety level 2 guidelines. Please refer to the CDC website for specimen handling biosafety guidelines: <http://www.cdc.gov/biosafety/>

TIMING OF SPECIMEN COLLECTION

Virus detection: Specimens should be collected as soon as possible after onset of illness, preferably within the first 3-4 days. Although some viruses may be detected after longer time periods, the likelihood of recovering most respiratory viruses diminishes after 3-4 days.

Serodiagnosis: Serum specimens should be collected during the acute stage of the disease, preferably during the first week after onset of illness, and again during convalescence, 2 to 3 weeks later. A single serum specimen collected during the acute phase of illness can be used in certain situations, such as for detection of human parvovirus B19. For MERS detection, a single serum specimen should be collected ≥ 2 weeks after symptom onset.

SPECIMEN TYPE

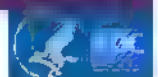

A variety of specimens are suitable and include nasopharyngeal (NP) swab, oropharyngeal (OP) swab, NP aspirate, NP wash, OP wash, bronchoalveolar lavage, tracheal aspirate, sputum, serum, blood, urine, stool, conjunctival swab, viral isolate, and cerebral spinal fluid. Multiple respiratory specimen types of ample volume are preferred. NP and OP swabs collected from the same patient can be placed together in a single vial. Swab specimens should be collected using only swabs with a synthetic tip (e.g., polyester, Dacron®) and an aluminum or plastic shaft. Swabs with cotton tips and wooden shafts are not recommended. Specimens collected with swabs made of calcium alginate are not acceptable. Cell culture medium from a virus isolate can be sent in a screw-cap vial.

SPECIMEN COLLECTION AND STORAGE

Detailed specimen collection and handling guidelines are available at: <http://www.cdc.gov/urdo/specimen.html>
Specific specimen collection/handling instructions and biosafety guidelines for MERS-CoV specimens are available at: <http://www.cdc.gov/coronavirus/mers/lab/index.html>

Refrigerate all specimens promptly after collection. If specimens can be shipped to CDC within 72 hours of collection, they should be kept refrigerated at 4°C and shipped on gel ice-packs. Freezing should be avoided if possible, as this will reduce virus viability. If specimens must be held for >72 hours, they should be promptly frozen at -70°C and shipped on dry ice. Liquid specimens should be aliquoted into properly labeled, leakproof, unbreakable screw-cap vials. Samples should be collected and processed in a manner that prevents cross-contamination between specimens, including changing gloves between specimens. Virus isolates can be shipped on gel ice-packs.

Continued on next page

SPECIMEN LABELING AND DOCUMENTATION

LABEL: All specimens must be labeled with a unique identifier assigned to the patient. The type of specimen and date collected should also be on the label.

FORM: Each specimen should be accompanied by a completed CDC Form 50.34 (also known as a DASH form). A copy of the form is available at: <http://www.cdc.gov/laboratory/specimen-submission/form.html>

LINE LIST: For multiple specimens, please include a line list of all specimens containing the unique patient and specimen identifiers, specimen type, date specimen collected, onset date of illness, previous test results, tests requested, and patient clinical description. Hard-copy and electronic versions should be provided.

SUBMITTER: Include the full name, title, complete mailing address, email address, telephone, and fax number of the submitter. This will be the person to whom the final report will be mailed.

SHIPPING GUIDELINES

Specimens should be packed according to International Air Transport Association (IATA) regulations <http://www.iata.org/whatwedo/cargo/dgr/Pages/index.aspx>. Shipments from outside of the United States may require an importation permit that can be obtained from the CDC. For specific instructions, see the "Packing, Shipping, and Transport" section from this CDC webpage document (last section): <http://www.cdc.gov/coronavirus/mers/guidelines-lab-biosafety.html>

Specimens should be stored and shipped at the temperatures indicated in the *Specimen Collection and Storage* section above. If samples are unable to be shipped within 72 hours of collection, they should be stored at -70°C and shipped on dry ice. Virus isolates can be shipped on gel ice-packs. When shipping a frozen specimen from long distances or from international locations, it is best to use a combination of dry ice and frozen gel ice-packs. The gel ice-packs will remain frozen for a day or two after the dry ice has dissipated.

All specimens must be prepacked to prevent breakage and spillage. Specimen containers should be sealed with Parafilm® and placed in ziplock bags. Place enough absorbent material to absorb the entire contents of the Secondary Container (containing Primary Container) and separate the Primary Containers (containing specimen) to prevent breakage. Send specimens with cold packs or other refrigerant blocks that are self-contained, not actual wet ice. This prevents leaking and the appearance of a spill. When large numbers of specimens are being shipped, they should be organized in a sequential manner in boxes with separate compartments for each specimen.

Some things ***not to do***:

- Do not place any dry ice in the "Primary Container" or "Secondary Container", foam envelopes, ziplock bags, cryovial boxes, or hermetically sealed containers.
- Do not place Primary Containers sideways or upside down in ziplock bags.
- Do not place any paperwork in the Secondary Containers or ziplock bags, so as not to damage the paperwork.
- Do not use biohazard/autoclave bags to prepack your materials due the inadequate seal of these bags.

Specimens should be shipped for overnight delivery for arrival at CDC. ***If testing on a Saturday/Sunday/Holiday has been approved, make sure that the shipping instructions specify a Saturday/Sunday/Holiday arrival at the main CDC gate.*** Please email CDC laboratory staff (sgk5@cdc.gov) the shipping information, including the tracking number. All packages should be sent to:

¹ For NNDSS reporters, use GenV2 or NETSS patient identifier

² Fever may not be present in some patients, such as those who are very young, elderly, immunosuppressed, or taking certain medications. Clinical judgement should be used to guide testing of patients in such situations

³ Close contact is defined as: a) being within approximately 6 feet (2 meters) or within the room or care area for a prolonged period of time (e.g., healthcare personnel, household members) while not wearing recommended personal protective equipment (i.e., gowns, gloves, respirator, eye protection), or b) having direct contact with infectious secretions (e.g., being coughed on) while not wearing recommended personal protective equipment. Data to inform the definition of close contact are limited. At this time, brief interactions such as walking by a person, are considered low risk and do not constitute close contact.

Dear Dr. Debolt,

Thank you very much for submitting your specimens for diagnostic testing for 2019 Novel Coronavirus. Attached please see our report containing test results on the specimens received. The report has been encrypted with a password. The password will be sent to you in a separate email.

Please contact us if you have any questions.

Thank you,

Steve

Subject: Washington State 2019 nCoV PUI

Hello,

I received a phone call from Chas Debolt (chas.debolt@doh.wa.gov, cell (b)(6) home (b)(6) (b)(6) office 206-418-5431), WA Department of Health this afternoon.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) per MD. 2 NP swabs were taken, 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6).

Given clinical history and epidemiologic link, this patient **does meet the criteria for 2019 nCoV person under investigation (PUI)**. Next steps recommended to Ms. Debolt:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible)
2. Please fill out the nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here https://www.cdc.gov/coronavirus/2019-ncov/guidance_home_care.html and https://www.cdc.gov/coronavirus/2019-ncov/guidance_prevent_spread.html. The local HD will monitor the patient.
5. Provider at clinic was recommended to implement standard, contact, airborne precautions and wear eye protection with the patient. Patient to continue face mask.

Thank you,
Lindsay

Subject: Re (time sensitive) WA lab result?

Hi Bill and Steve,

I am an on call med epi for nCoV. Last night around midnight a WA state health official called me for results on a 1/23 PUI specimen. PUI is a (b)(6) national, now asymptomatic, who was only in (b)(6) and low suspicion. Her (b)(6) in Seattle has her in isolation and wants to release her if her test is negative. Unfortunately I didn't get her ID because state officer didn't have it on hand. Do you have a result ready today that we can give her? State POC is Chas Debolt (b)(6) Sooner the better if possible to facilitate PUI's return to (b)(6)

Thanks,
Maureen Miller

Hi Gary and Joe:

Just wanted to follow up. Ms. DeBolt is concerned about how to get the specimens to CDC. She thinks she will need to go pick them up herself – Can world courier do this? Does the Public Health Laboratory have to pack the specimens? Those were her main questions. If you can get back to her, that would be great. Her contact information again:

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.

4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
https://www.cdc.gov/coronavirus/2019-nCoV/lab_biosafety_guidelines.htm.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Dear Romesh,

Thank you very much for submitting your specimens for diagnostic testing for 2019 Novel Coronavirus. Attached please see our report containing test results on the specimens received. The report has been encrypted with a password. Please verify that you have received this report. The password will be sent to you in a separate email.

Please contact us if you have any questions.

Thank you,

Steve

Hello all:

I just spoke with Eileen. I have sent an email (all of you are cc'ed) to Ms. Debolt and have also asked her for a phone call with her state lab POC so we can get these specimens to CDC ASAP.

I will follow-up with an update when I know final shipping plans/contact information, etc.

Best,
Lindsay

Hi Gary and Joe:

Just wanted to follow up. Ms. DeBolt is concerned about how to get the specimens to CDC. She thinks she will need to go pick them up herself – Can world courier do this? Does the Public Health Laboratory have to pack the specimens? Those were her main questions. If you can get back to her, that would be great. Her contact information again:

chas.debolt@doh.wa.gov, cell (b)(6), home (b)(6), office 206 418 5431

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6) (b)(6) Thank you so much!

Best,
Lindsay

Lindsey, All,

World Courier can pick up from most any location but the specimen has to be properly packaged. That is important because we don't need to send the specimen to the public health lab or other location IF NOT REQUIRED for proper packaging. This only delay the shipment.

This is what happened on the first specimen. Gary or Steve can weigh in as necessary.

Hi Gary and Joe:

Just wanted to follow up. Ms. DeBolt is concerned about how to get the specimens to CDC. She thinks she will need to go pick them up herself – Can world courier do this? Does the Public Health Laboratory have to pack the specimens? Those were her main questions. If you can get back to her, that would be great. Her contact information again:

chas.debolt@doh.wa.gov, cell (b)(6), home (b)(6), office 206 418-5431

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance.

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each

specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab/biosafety-guidelines.htm>.

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Satish,

We have run the new assay here in house. We are seeing an issue with the N3 showing amplification late in the NTC and the HSC. We received all reagents today, aliquoted them out and did a test run with HSC extractions only from two different analyst's.

Staff followed the normal protocol of capping NTC, HSC and then positive controls. We do perform the PCR master mix and template addition in different rooms with correct directional workflow. I had the run repeated and the NTC and HSC showed amplification late. As well we used new aliquots of reagents to ensure that there was no cross contamination from the first run. I have attached screen shots of the results and amplification plot.

Thoughts?

Cheers,
Denny

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay

Satish,

We have run the new assay here in house. We are seeing an issue with the N3 showing amplification late in the NTC and the HSC. We received all reagents today, aliquoted them out and did a test run with HSC extractions only from two different analyst's.

Staff followed the normal protocol of capping NTC, HSC and then positive controls. We do perform the PCR master mix and template addition in different rooms with correct directional workflow. I had the run repeated and the NTC and HSC showed amplification late. As well we

used new aliquots of reagents to ensure that there was no cross contamination from the first run. I have attached screen shots of the results and amplification plot.

Thoughts?

Cheers,
Denny

Subject: Washington State 2019 nCoV PUI

Hello:

I received a phone call from Chas Debolt (chas.debolt@doh.wa.gov, cell (b)(6) home (b)(6) office 206-418-5431), WA Department of Health this afternoon

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6) arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, T99, BP 134/87, Pulse 110, RR 16, O2 sat 96% RA. Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. PA and lateral CXR clear per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. Flu RADT was negative for Flu A and B.

Given clinical history and epidemiologic link, this patient **does meet the criteria for 2019 nCoV person under investigation (PUI)**. Next steps recommended to Ms. Debolt:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible)
2. Please fill out the nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and

<https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html> The local HD will monitor the patient.

5. Provider at clinic was recommended to implement standard, contact, airborne precautions and wear eye protection with the patient. Patient to continue face mask.

Thank you,
Lindsay

Subject: Specimen Shipping: Washington State 2019 nCoV PUI

Hello all:

I just spoke with Brian Hiatt who gave me the contact information of the microbiologist who will hand off the specimens for 2019 nCoV testing to World Courier:

Jessica Gant

Cell (b)(6)

Desk 206-418-5562

Address: 1610 NE 150th Street, Shoreline, WA 98155

The DOH has asked that World Courier call Ms. Gant on both phone lines as cell reception is poor in the lab when arranging pick-up.

Steve: The lab plans to ship these using Category A (b)(5) let them know that guidance is Category B, but they said Category A is even "more secure"?

Thanks,
Lindsay

Thank you very much for these instructions, Dr. Kim. The patient has now been discharged from the walk in clinic. I will be driving up to Snohomish County to transport the specimens back down to WA PHL

shortly. I am copying in the WA PHL Microbiology Office Director and our WA State Epidemiologist for Communicable Diseases.

I did not find **information about how to contact World Courier**. Did I miss that in the shipping instructions, or do you contact them for us once the specimens are ready for pick up? If not, will you please provide contact information.

Best regards,
Chas

Subject: RE: Washington State 2019 nCoV PU1

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version**. In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC 10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PU1". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:
<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these**

specimens get collected properly and transported to CDC overnight. We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic (b)(6) (b)(6). Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6)

(b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)
(b)(6) Thank you so much!

Good morning,

As we have decided to stop with our verification with the N3 showing amplification in our NTC's and HSC's at about 50%; are you asking us to continue to perform the verification?

Could I also please get a situational update from CDC about what is being done , possible future steps or meetings to discuss the aberrant activity, for the WA state emergency management team. I also need to give a situational update to the WA Secretary of Health today about why testing is being delayed and a timeline for next steps for getting the assay up and running at the WA Public Health Lab.

Cheers,
Denny

Subject: Specimen Shipping: Washington State 2019 nCoV PUI

Hello all:

I just spoke with Brian Hiatt who gave me the contact information of the microbiologist who will hand off the specimens for 2019 nCoV testing to World Courier:

Jessica Gant

Cell (b)(6)

Desk 206-418-5562

Address: 1610 NE 150th Street, Shoreline, WA 98155

The DOH has asked that World Courier call Ms. Gant on both phone lines as cell reception is poor in the lab when arranging pick-up.

Steve: The lab plans to snp these using Category A (b)(5) let them know that guidance is Category B, but they said Category A is even "more secure"?

Thanks,
Lindsay

Hi Chas:

Thanks! I'd still request that we talk on the phone for further instructions about the packaging of the specimens to make sure we get this shipment right since it's a holiday weekend. Please let me know when we can speak with you and a POC who will be working with these specimens

We will need the name and a phone number of the person who will actually handoff the specimens to World Courier. Once you have identified this person, please let me know, and CDC will then arrange shipment and provide more details to you.

Best,
Lindsay

Thank you very much for these instructions, Dr. Kim. The patient has now been discharged from the walk-in clinic. I will be driving up to Snohomish County to transport the specimens back down to WA PHL shortly. I am copying in the WA PHL Microbiology Office Director and our WA State Epidemiologist for Communicable Diseases.

I did not find **information about how to contact World Courier**. Did I miss that in the shipping instructions, or do you contact them for us once the specimens are ready for pick up? If not, will you please provide contact information.

Best regards,

Chas

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50 34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI" Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

1. Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. **I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC.** Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
2. Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
3. Please make sure to obtain all clinical testing results and record on the PUI form.
4. Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Subject: RE: Ct and Amp plots from WA

Good morning,

As we have decided to stop with our verification with the N3 showing amplification in our NTC's and HSC's at about 50%; are you asking us to continue to perform the verification?

Could I also please get a situational update from CDC about what is being done , possible future steps or meetings to discuss the aberrant activity, for the WA state emergency management team. I also need to give a situational update to the WA Secretary of Health today about why testing is being delayed and a timeline for next steps for getting the assay up and running at the WA Public Health Lab.

Cheers,
Denny

Denny Russell

Thank you for contacting us with your observations. We will continue to monitor this aberrant activity with N3 and address it as quickly as possible. Please let us know if you continue to see this or other aberrant activity with the assay panel.

Best regards,

CDC Respvirus Response Teamrespvirus@cdc.gov**From:** Russell, Denny (DOH) <Denny.Russell@DOH.WA.GOV>**Sent:** Sunday, February 9, 2020 6:37 PM**To:** eoc@aphl.org; Resp Virus (CDC) <respvirus@cdc.gov>**Subject:** Ct and Amp plots from WA

Good afternoon,

Please find attached the Ct values and amplification plots from our runs.

The WA PHL is stopping any further verification plans for testing, until we receive guidance on the anomalies with N3. We are currently seeing a ~50% rate of late amplification of the N3 primer /probe set.

Cheers,

Denny

Copying in Brian Hiatt from PHL on this communication also. He is coordinating specimen shipment at present.

Subject: RE: Washington State 2019 nCoV PUI

Hi Chas:

Additional specimen shipping guidance:

1. **General shipping info:** Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient's ID number, unique specimen ID, specimen type and the date the sample was collected. Complete a CDC Form 50.34 (aka DASH form) for each specimen submitted. **This was recently updated in December 2019, so please make sure to use the correct version.** In the upper left box of the form, 1) for *test requested* select "Respiratory virus molecular detection (non-influenza) CDC-10401" and 2) for *At CDC, bring to the attention of* enter "Stephen Lindstrom: nCoV 2019 PUI". Send us the tracking number when available.

Also some biosafety and specimen packaging guidelines for the 2019 nCoV:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>

If it hasn't been communicated already to you about specimen shipment, the courier service cannot package the specimens and ship them to CDC. In this case, your state public health laboratory will need to be involved. **Please arrange a call with me, you, and your state lab POC so we can make sure that these specimens get collected properly and transported to CDC overnight.** We can provide a conference line if you need it, just let me know.

Thanks,
Lindsay

Subject: Washington State 2019 nCoV PUI

Dear Chas:

Thank you for talking to the clinician with me. I am sending follow-up instructions and documents as promised.

Clinical summary:

35 y.o. (b)(6) M (b)(6) who recently visited Wuhan from (b)(6). He arrived in the US on January 15, 2020, and on January 16, 2020, patient endorsed subjective fever, cough, and nasal congestion at home. He did not measure fever and did not take any OTC medications. Cough got worse over the weekend. He got a notice about novel coronavirus, so he came into walk-in clinic today and saw provider, who reported this case to the DOH. DOH then alerted CDC via EOC. In clinic, (b)(6) (b)(6) Otherwise healthy looking per provider and patient feels otherwise well. Patient does not recall any sick contacts or any contact with any nCoV confirmed cases or PUIs. Denied any livestock exposures or exposure to livestock/seafood markets. Denied any exposures to healthcare settings in previous 14 days to symptom onset. (b)(6) (b)(6) per MD. 2 NP swabs were taken; 1 sent for RVP via PCR. Patient was isolated in his room with facemask on. (b)(6)

Given clinical history and epidemiologic link, this patient does meet the criteria for 2019 nCoV person under investigation (PUI). Next steps:

- 1) Obtain clinical specimens, including NP, OP, serum, stool and urine (the latter two, if possible). Attached are the submission guidelines for specimens and DASH forms. I have cc'ed Gary Goolsby and Joe Gregg who will be able to answer questions regarding specimen transport from the provider's clinic to CDC. Website: <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>.
- 2) Please fill out the attached nCoV PUI investigation form. Complete and email or fax to me or the EOC as instructed on the form.
- 3) Please make sure to obtain all clinical testing results and record on the PUI form.
- 4) Because the patient is mildly ill, CDC recommends home isolation. CDC guidance is here: <https://www.cdc.gov/coronavirus/2019-ncov/guidance-home-care.html> and <https://www.cdc.gov/coronavirus/2019-ncov/guidance-prevent-spread.html>.

Please let me know if you have any questions or concerns. I can be reached via email or (b)(6)

(b)(6) Thank you so much!

Best,
Lindsay
